

# DURMAZ

## DIN RAIL THERMOSTAT

| PARAMETER                       | VALUE                     |
|---------------------------------|---------------------------|
| Temperature Setting Range       | 0°C - 70°C                |
| Contact Type                    | Rapid Moving              |
| Contact Resistance ( $\Omega$ ) | 10M $\Omega$              |
| Sensor                          | Bimetal NTC               |
| Operating Voltage               | AC24 230V                 |
| Frequency                       | 50 Hz                     |
| Machine Switching Current       | 230V 10A                  |
| Protection Class                | IP20                      |
| Mounting Type                   | 35mm DIN Rail             |
| Operating Temperature Range     | -20°C +80°C (-49°F+176°F) |
| Input                           | 2 Poles Terminals         |
| Body Material                   | ABS V0                    |
